

YOELI BARTHEL

Software Engineer — Full Stack & AI

Ashdod, Israel | +972-58-5060398 | yoelibarthel603@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Software Engineer with a B.Sc. in Software Engineering (AI specialization) and hands-on full-stack experience building SaaS platforms and AI-powered systems with React, Next.js, TypeScript, Node.js, and Python. Ships production-ready software end to end — from API design and data modeling to cloud deployment — including a scheduling platform in daily use at Chevron / G-One.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, Java, C++, C
Frontend	React, Next.js, Flutter, MUI, shadcn/ui, HTML5, CSS3
Backend	Node.js, FastAPI, REST APIs, OAuth, third-party API integrations
Databases	PostgreSQL, MongoDB, SQLite, Supabase, Prisma, Neon
Cloud & Tools	Vercel, Oracle Cloud, CI/CD, Git, Jira, Confluence, Jest, Postman, AI-assisted development (Cursor, Claude Code)
Specialties	Constraint optimization (CP-SAT / OR-Tools), scheduling algorithms, AI/ML

EXPERIENCE

Backend Developer — Julius Agency

2025 – 2026

- Developed CRM backend features and modules for professional clients, focusing on API design, business logic, and database integration.
- Designed backend architecture and REST APIs with Node.js, TypeScript, Prisma, and Supabase; integrated third-party services and optimized data models.
- Improved code quality through bug fixing and reviews; accelerated delivery with AI-assisted development tools (Cursor, Claude Code).

Full Stack Developer — Freelance

2024 – Present

Sidour Avoda (G1 Schedule Manager) — AI-powered scheduling platform, in production at Chevron / G-One ([sidour-avoda-website.vercel.app](#))

- Designed a scheduling optimization engine using CP-SAT constraint-programming algorithms with conflict detection, availability management, and automated report generation.
- Built the SaaS web app (worker and director menus, site role management) with TypeScript, Next.js, and shadcn/ui, plus backend APIs with Python and FastAPI on PostgreSQL.
- Shipped a companion desktop application (Python, Tkinter, SQLite, PyInstaller) with an automatic update system.
- Deployed on Vercel, Neon, and Oracle Cloud; ensured reliability with Jest and Postman test suites.

Additional client websites — [portfolio](#)

- Delivered end-to-end websites for fitness (course booking, admin panel), healthcare (bilingual French/Hebrew), wedding invitation platforms with guest RSVP and headcount management, and showcase clients (React, TypeScript, MUI, Vercel).

Security Operations Manager — Chevron / G-One

Present

- Lead a team of 5 guards: shift scheduling, security protocol implementation, incident reporting, and training of personnel.

Optics Technician — Israeli Defense Forces (IDF)

2019 – 2021

- Maintained and calibrated optical and optronic equipment for aerial and naval vehicles; technical problem-solving under pressure in critical environments. Certified Optics Technician (Level 07).

EDUCATION

B.Sc. in Software Engineering — Specialization in Artificial Intelligence

2022 – 2025

Sami Shamoon College of Engineering, Israel

- Key courses: Object-Oriented Programming, Data Structures, Algorithms, Operating Systems, Software Architecture, Computational Complexity, AI/ML.

PROJECTS

SurveyFlow — Survey Platform ([surveyflow.co](#))

2024 – 2025

- Built a live survey platform with a drag-and-drop builder, dynamic question logic, real-time analytics, multi-language support, and OAuth authentication (React, Next.js, Node.js, MongoDB).

DiveSpot — Social Network (Team Project)

2024

- Developed a social platform for diving enthusiasts with interactive dive-site mapping, dive logs, and real-time chat (React, Node.js, MongoDB), collaborating in an agile workflow with Jira, Confluence, and CI/CD.
